FARM SUPPLIES

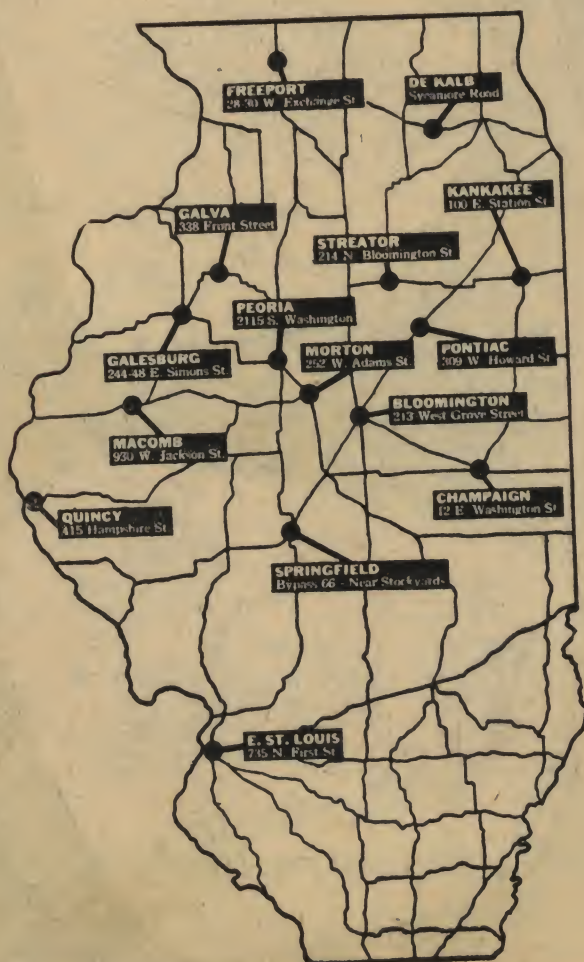

Interlocking

New LOW Cash & Carry Prices!

INTERLOCKING Fences are manufactured in our own modern factory in Morton, Ill. Other items are purchased from manufacturers in large quantities. In these operations the wholesaler is eliminated. New Low Cash & Carry Prices in this catalog apply to all merchandise picked up at an Interlocking store or at the factory in Morton. FREE Delivery To Your Farm at quoted Delivered prices on orders for \$50.00 or over. In cases where it is impractical to deliver by truck due to destination being too far from our regular trucking lines, we reserve the right to ship by Prepaid Freight to the nearest freight station.

We believe our purchases and stock on hand are sufficient to meet all normal requirements of our customers during the period for which this catalog is intended. However, we are unable to guarantee that we shall be able to supply every item throughout the life of this catalog. We reserve the right to increase prices if it becomes necessary.

BIG NEW INTERLOCKING STORES in leading Illinois cities are now ready to serve you. Large display floors and warehouses permit you to make your selections from a complete assortment, and in many cases you can carry the goods home with you in your own car or truck. You will find expert, courteous service at your INTERLOCKING Store. You are invited to stop in and visit there. It's only a few minutes drive from your home.

15 Big Factory Stores To Serve You Better

Your Credit Is Good At Interlocking

We invite you to open a charge account at your nearest INTERLOCKING Store. All customers with approved credit may purchase from us under 30 day open account. Customers who desire longer than 30 days to pay for their merchandise may purchase under our Easy Payment Plan with up to 12 months to pay.

Now, Every Rod of Interlocking Fence

100%

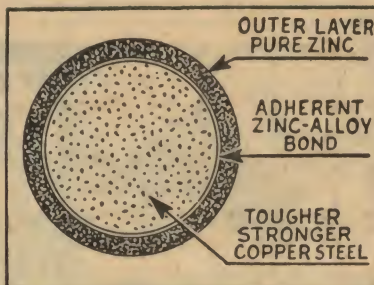

GUARANTEED
Zinc-Sealed
ZINC-SEALED

WIRE

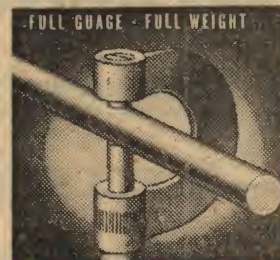

Make This Standard Galvanizing Test In Your Own Home

You can easily make a standard galvanizing test with materials we will send you free of charge. Upon request we will send you a small sample of INTERLOCKING Zinc-Sealed wire to make this test. You simply dip the sample of our fence in a solution of sulphate of copper (blue vitriol) pounded fine and mixed with $\frac{1}{2}$ pint of water at 60° Fahrenheit. You will find INTERLOCKING wire to stand as many immersions as any wire used in fencing, and to be as long lasting as any fence made.

Triple Protection Against Rust and Weather

Triple Protection against Rust is provided by the Zinc-Sealed method of galvanizing. The thick outer layer is pure zinc. The heavy outer layer is bonded to the surface of the wire by a zinc-iron alloy, which in itself forms a second barrier against rust and corrosion. Copper content in the wire forms a third line of defense. Zinc-Sealed wire is built for extra years of service.

All Interlocking Fences are honest measure—full weight—full gauge.

The even galvanizing will not chip or flake even when the wire is wrapped around its own diameter.

Our Guarantee

Backed by Our Entire Capital Stock

WE GUARANTEE every article in this catalogue to be as illustrated and described. We GUARANTEE every rod of Fence to be satisfactory and further GUARANTEE the quality of our Fence to be as good as any made and to use OPEN HEARTH STEEL GALVANIZED WIRE—the kind government experts have decided is the best and most durable.

If for any reason the purchaser finds the Fence unsatisfactory after testing it, according to our 30 days' Free Trial Offer, we hereby agree to refund the full purchase price and pay the freight on the shipment both ways. Should the Interlocking Fence Co., for any reason fail to refund the money for Fence given to the Morton State Bank, then the approved bond for \$20,000.00, we hereby authorize them to remit direct to the customer any money paid for said Fence, and to charge said amount to our account, and we by the terms of this bond obligate ourselves to make good the money returned. Dated this 10th day of June, 1906.

Interlocking Fence Co.

B. G. G. TREASURER

We Guarantee You Satisfaction

- We guarantee every item to be as described and illustrated.
- We guarantee every item to be free of defective material and workmanship.
- If any item does not prove satisfactory, we want you to return it to us, we will exchange it for an item more suitable, or refund any payments made.

INTERLOCKING STORES SAVE YOU MONEY

Interlocking Wrapped-Stay Farm Fence

—No Finer Fence Made—

The even Galvanizing will not chip or flake, even when the wire is wrapped around its own diameter.

All INTERLOCKING wires are honest measure. Full Weight and Full Gauge.

All INTERLOCKING Wrapped Stay Fence is made with Copper-Bearing Steel, Zinc-sealed Galvanized, for Triple Protection against rust and weather, providing years of extra service. There is no finer fence made than Interlocking Fence.

RAIL STEEL FORMED END BRACES

Made from high carbon rail steel. Heavier, stronger than most braces on the market. 9 ft. long—weighs 18 lbs. Baked-on red enamel.

\$2⁹⁵

Interlocking Rail Carbon Steel Posts

- Easy To Drive
- Made of Rail Steel
- Broad, Heavy Anchor Plate
- Makes A Better Looking Fence

A--Punched Angle Posts

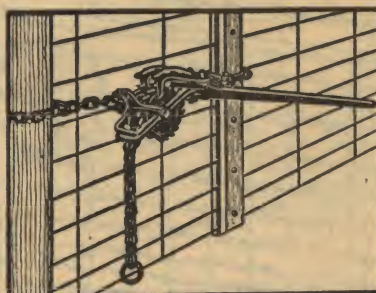

Interlocking Punched Angle Posts are designed to build sturdy fences at a reasonable cost. They are ideal for permanent fences, or for temporary fences where the posts can be moved from one location to another. Posts have double riveted anchor plates to hold them solidly. Painted red, rust resisting enamel.

B--Heaviest Studded Tee Posts

Interlocking Studded Tee Posts are among the heaviest Steel Posts manufactured. Made of rail carbon steel, similar to that used by railroads for rails. They have unusual strength and stiffness, still are not brittle. The posts have double riveted anchor plates to hold them solidly and prevent turning. Fasteners are furnished free. Painted red, rust resisting enamel.

Interlocking **Non - Climabable Fence**

Your Low-Priced Silent Guardian

- Guard your children from danger
- Protect your flowers--shrubs
- Discourage prowlers
- Establish your property lines
- Climb-proof openings
- Rust resisting copper-steel
- Galvanized rust protection
- Sturdy, rugged mesh design
- Vise-like knot
- Choice of six heights

Here's the ideal low-cost fence for keeping youngsters "in" or "out" and safeguarding your premises against the casual trespasser.

The No. 12½ gauge is particularly adapted for town, country and farm use. It is sufficiently strong to turn all farm stock, and is the style to use in safeguarding orchards, truck gardens, etc.

The No. 11 gauge is preferable for permanent fences, or where strains may be heavy. It is especially suitable in cities for factory, school, park and cemetery protection. For a lasting investment that combines both protection and economy, 11 gauge is just the kind of fence you want.

12½ Gauge Fence

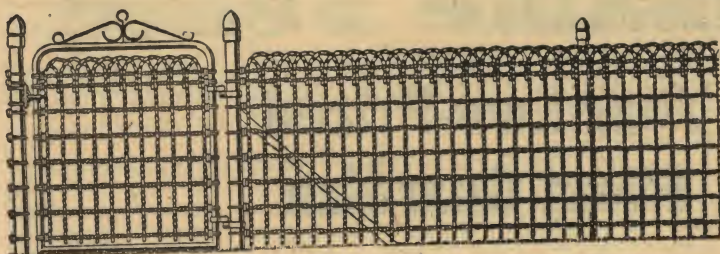

Style No.	Height	Price Per 100' Roll
1036-2-12½	36"	\$18.00
1140-2-12½	40"	21.00

Interlocking

KENNEL FENCE

Galvanized Portable Kennel Runs

You will like these Interlocking Movable Kennel Runs because they are so easily erected and can be easily moved at any time.

Provide one of the strongest and most attractive systems of runs manufactured.

Each run is built with panel sections, which are rigidly and securely held together with panel clamps. No post to set, wire to stretch or gates to hang. Gate Units are completely assembled at the factory before they are shipped. Gates swing freely and latch securely.

SPECIFICATIONS

**America's Biggest Garden Tractor Value
Makes light work of the toughest jobs**

Roticut

3 H.P. Rotary

Tiller — Cultivator

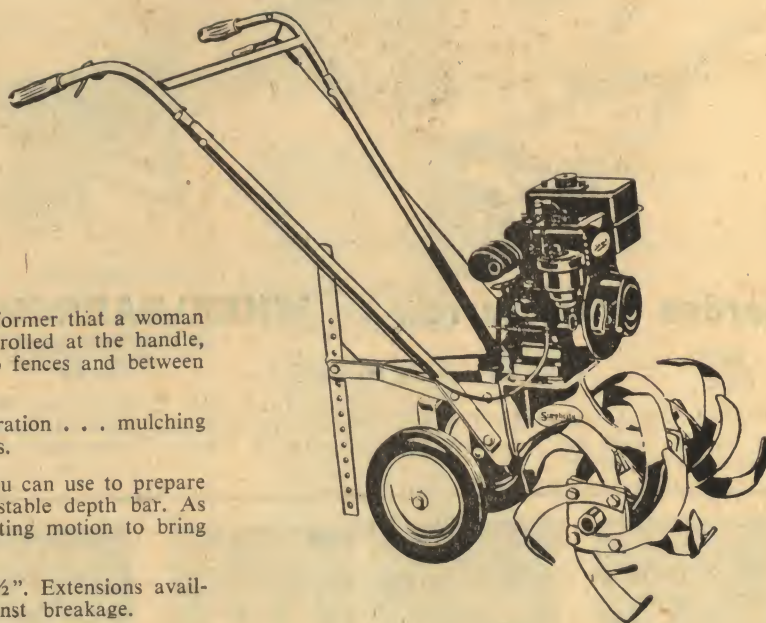

— Full Power Reverse —

America's favorite in rotary tillers is a rugged performer that a woman can handle. Forward and reverse motion are controlled at the handle, makes it easy to keep ground worked clean up to fences and between shrubs, with no back-breaking "pull back".

Provides perfect rotary tilling for seed-bed preparation . . . mulching . . . trash burying . . . and scores of other chores.

3 H.P. Briggs & Stratton engine is a sod-buster you can use to prepare the toughest soil, controlling depth with an adjustable depth bar. As it cuts, it crumbles soil with a gentle spading, lifting motion to bring soil to planting perfection.

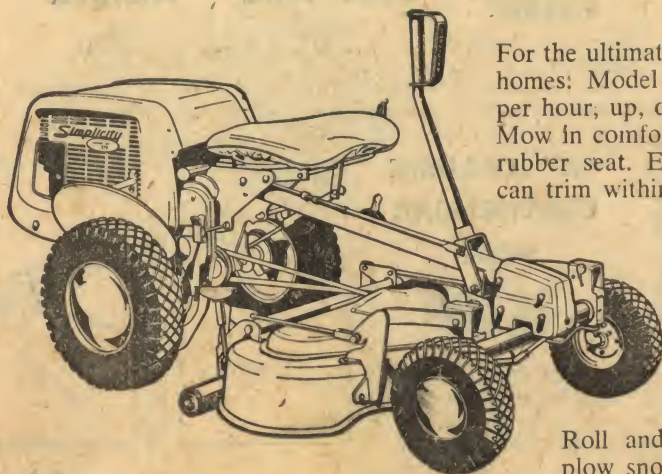

Self-sharpening tines adjustable from 8½" to 20½". Extensions available for maximum width 29". Guaranteed against breakage.

WONDER-BOY RIDING POWER UNIT

Riding Lawn Mowers

For the ultimate in lawn care on large estates, institutions and suburban homes: Model 575 with 32" rotary mower, mows up to 1½ acres per hour, up, down or along 40% slopes with ease and stability. Mow in comfort at 5 MPH, ride on 4 soft pneumatic tires and a foam rubber seat. Extremely maneuverable—turns within 4½ ft. radius—can trim within ⅝" of shrubs and trees.

Briggs & Stratton 5¾ H.P. engine. Your choice of rotary, reel and gang mowers for every lawn cutting job—plenty of power to pull carts, rollers and other attachments.

Roll and feed your lawn—mulch leaves—haul heavy loads—plow snow or do light grading—all with power to spare.

Wonder - Boy '700'

The World's Most Advanced 7 H.P. Riding Tractor

No Other Riding Tractor Can Equal
This Combination of Features:

- Ground-Hugging Stability
- 3-to-1 Steering, Easiest Handling and Maneuverability
- Single Pedal Clutch and Brake Control
- Conveniently Located Gear Shift Lever
- Full 7 Horsepower Engine
- Handy Attachment Lift

There need never be an idle week for your Simplicity 700 . . . For here's easy-to-use power for preparing seed beds, cultivating garden plots, maintaining the kind of velvet lawn that turns the neighbors green with envy, clearing snow from walks and driveways. You name it—Simplicity does it . . . faster, safer, more efficiently than any other tractor of its kind. Check the many exclusive time, labor and money-saving features this new Simplicity 700 offers—and put them to work for you now!

"Easy-Lift" Lever for heavy attachments. Electric Starter and Generator available. New Spur-Gear Differential for controlled traction. Three-Speeds Forward and Reverse. Accessible Working Parts. Efficient Power Flow. Engineered to deliver power efficiently to all power take-off points as well as to the wheels.

Attachments For Wonder-Boy '700'

32 in. Rotary Tiller

Works as an efficient sod-buster, besides preparing ideal seed bed. Slow speed tilling assures proper soil preparation without pulverizing or breaking down soil structure.

10 in. Plow

Strong moldboard plow has rolling coulter to cut trash and leave a clean furrow, efficient depth regulator for precise furrow control.

8-12" Disc Harrow

Reversible gangs can be adjusted to throw in or out. Easy to attach.

32 in. Rotary Mower

"Free-Floating" mower feature assures "no-scalp" mowing despite rough or uneven ground. Mows $1\frac{3}{4}$ acres per hour. Quickly adjustable height of cut. Leaf mulching attachment available.

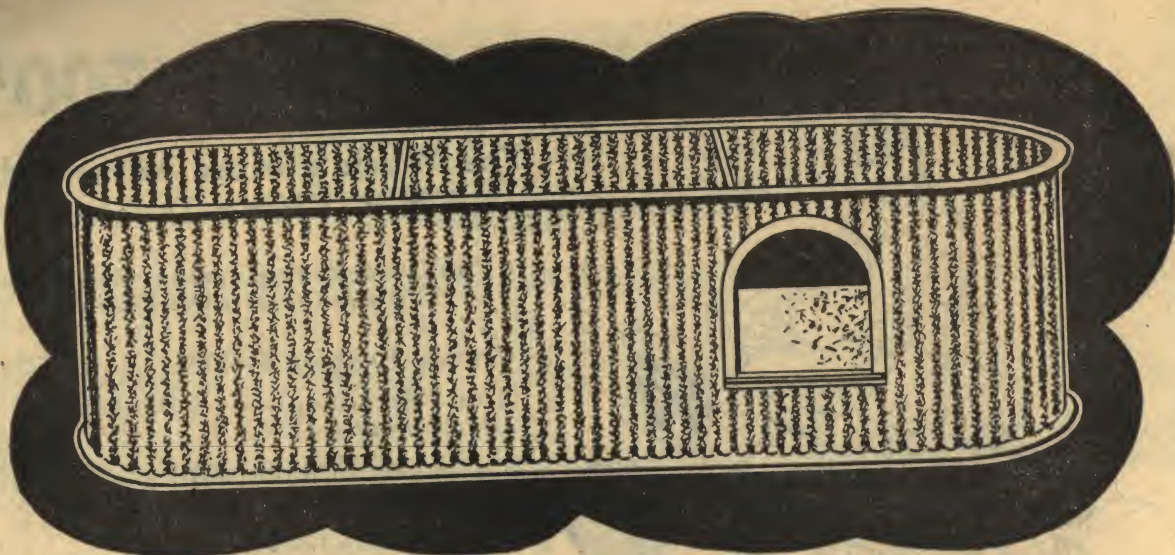

3-Gang Reel Mower

Three 21 in. heavy duty ground-driven mowers can cut a swath five feet wide in one pass. Mows $2\frac{3}{4}$ acres per hour.

Cultivator

Cultivate astride small plants, or between rows. Adjustable cultivating depth.

42 in. Snow Plow and Grader

GALVANIZED STEEL STOCK TANKS

Made of 20 Gauge Galv. Steel — Corrugated for Extra Strength
Rolled Reinforced Edges

These tanks are fabricated from galvanized steel sheets corrugated in a special machine which rolls a reinforced top and bottom rim. No solder is used, joints and seams are packed with elastic packing and securely riveted. Made of 20 gauge (heavier than 22 gauge) steel. Automatic Side Waterer functions perfectly by means of brass float and valve assembly which shuts off the water supply when proper level has been reached. Galvanized mud guard easily removed for cleaning.

When the hog scratches itself on the cast iron oars, insecticide or medicated oil is released from the reservoir and comes down to cover the body. Hogs treat themselves for lice, mange and dirt. You get the benefits. Holes provided for bolting to platform.

HEAVY 12 OZ.

Para-Waterproofed

Reinforced Canvas

Para-Waterproof Covers and Tarpaulins are made of extra fine closely woven cotton duck having great tensile strength in both warp and filler.

Para Covers are double stitched on all seams. Heavy rust-proof brass grommets are set at each corner and along the edges. For absolute protection from weather, mildew and rot, our Covers are thoroughly impregnated with the Para process, a paraffin base treatment, the type base recommended by the United States Government. Para treatment penetrates each fibre through and through, giving each thread a water-proofed saturation for the rest of its life.

SAVE ON STARLINE BARN EQUIPMENT

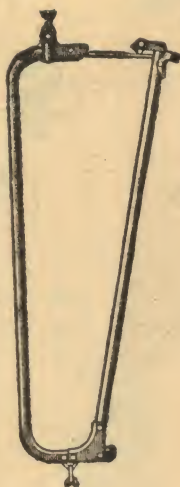

COMPLETE STANCHIONS and STALLS

INTERLOCKING STALLS are completely assembled at the factory before they are shipped. Simple one piece construction of 1½ in. O.D. steel pipe—20 to 40% thicker than tubing, giving more rust resistance. Forged stanchion swivels top and bottom, practically indestructible. Noiseless double bottom chain allows freedom forward and back without side play.

Two coats rust and ammonia resisting baked-on enamel.

Phone or write your INTERLOCKING Store for a complete estimate on a Starline installation for your barn.

ADJUSTABLE WOOD-LINED STANCHION

Made of full weight, high carbon steel U-bars size 1¼ in. x 1¼ in. x 3/16 in. Double varnished carefully fitted hard maple lining. One hand cow-proof knobby latch. Has standard 5 link chain at top and bottom. Two No. 627 clamps required for attaching top and bottom to wood frame.

No. 208-W—Ea.\$8.10

No. 627—Clamp, Ea.50

AUTOMATIC WATER BOWL

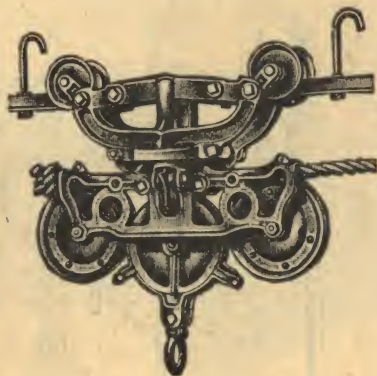

Keeps fresh water before your cows all the time. Made of heavy cast iron. Water flows only when cow presses on nose plate. Works on high pressure or gravity water systems. Non-corrosive brass valves. Easy to clean—easy to install.

No. NS-235-A—Water Bowl,
Ea.\$8.40

MILK STOOL

Sturdy all metal construction. Perfectly sanitary—easy to clean. Triangular braced heavy channel legs. Balanced for easy carrying. Height 12 inches.

No. 752-12—Ea.\$2.40

LOOSE TINE GRAPPLE FORK

Takes 9 bales at a time. Puts up any kind of hay—long, short or dry—in half the time. Trip lock never fails to open at jerk of rope—never opens by accident. Cleans most racks in three forkfuls.

No. 532—7½ ft. spread,
Ea.\$24.30

HAY CARRIER

Smoother running—operates easily on any kind of steel track. Longer wearing—contains no springs to rust out or break. Trouble-free—field tested by thousands of farm users. Long wheel base, 15¼ in., center to center. Sheaves 7 in. pressed steel—riveted—turn on self oiling bronze bearings. Axle is lathe turned cold rolled steel. Trip block malleable iron.

No. 493-B—Ea.\$56.80

ACCESSORIES

Double Angle Hay Track—Built of two pieces of one inch high carbon steel angles riveted together at one foot intervals. Held together with lug lock splices furnished with track, to prevent track from separating. Track furnished in 6 and 10 ft. lengths.

Refined Creosote Base
Protects and Preserves

1 Gallon Can . . \$ 5.30
5 Gallon Pail . . \$26.00

Here is the paint that is famous for its beautiful finish combined with the protective qualities of creosote.

Specially made for painting barns, fences, corn cribs, and sheds—providing outstanding beauty with maximum protection.

U. of Missouri Tests prove paint adds up to 40% (16 years) to life of a barn. It is non-injurious to livestock, is lead-free and mildew-resistant. It contains refined creosote oil which preserves wood. It is formulated with a disinfecting property and imparts a fresh cleansing odor.

Produces a bright, white egg-shell finish that "stays that way"—controlled chalking gives a soft cleansing feature and prevents cracking or peeling of film. Economical to use—covers 350 to 500 sq. ft. per gallon, depending upon the surface. FREE brushing gives one coat coverage on rough or paint hungry surfaces. Furnished in WHITE only.

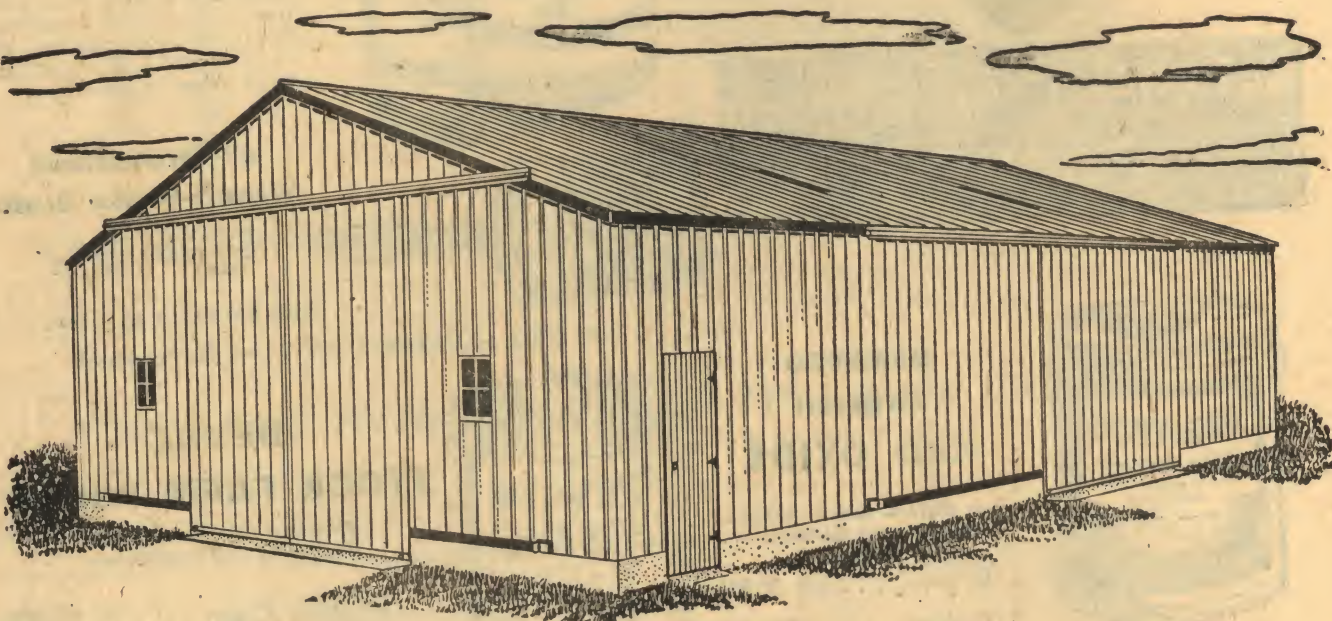

Aluminum Paint

\$4.95 Gal.

A brilliant, light reflecting paint. For use on metal, wood, brick, either inside or outside.

MORTON STEEL SPAN BUILDING NO. 51

STEEL RIGID FRAME GIVES GREATER STRENGTH PRE-FRAMED END PANELS SAVE LABOR

MORTON Steel-Span Buildings are furnished in standard widths of 40', 45' and 50'. The length can be any that is desired in units of 16'.

GREATER STRENGTH has been built into the MORTON Steel Span Building with the use of Rigid Steel Frames to support the roof and sidewalls. Tests made by loading the frames with concrete blocks indicate that each frame will support safely a load in excess of 16,000 lbs. Frames are set 16' on centers.

PRE-FRAMED END PANELS are quickly and easily set up in a matter of hours. Steel frames are bolted together on the ground and pulled into place. Wood purlins are nailed to the frames and roofing and siding sheets are nailed to the purlins. Detailed plans and erection instructions are furnished for each building.

ATTRACTIVE APPEARANCE. Roofing and Siding sheets are furnished in the new, Hi-Rib pattern to make a more

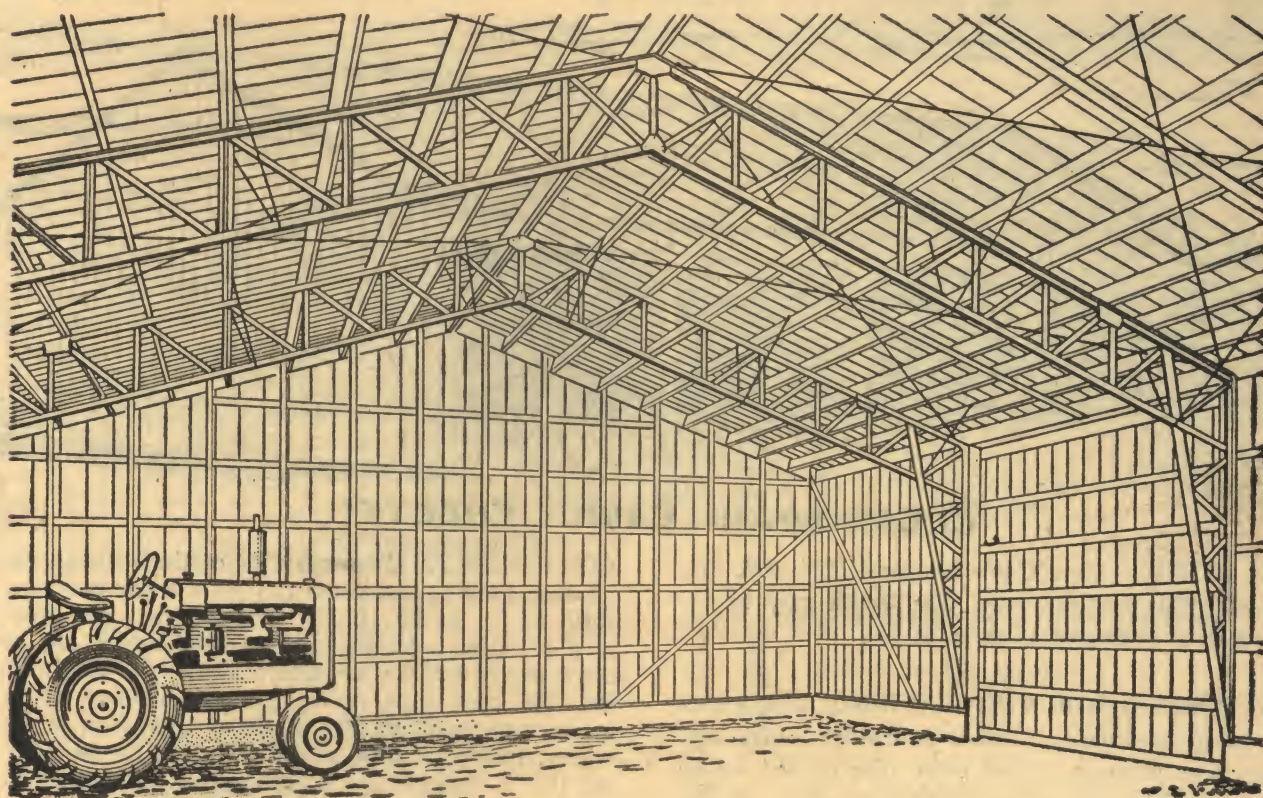

attractive appearance. The roof pitch (4 in 12) is low and modern. Doors, windows, cornice and roof overhang are trimmed with red enamel.

QUALITY MATERIALS. Every effort has been made to include only the finest quality materials. Roofing and Siding sheets are protected with Seal-of-Quality (2 ounce per sq. ft.) Zinc Coating—Lasts twice as long as ordinary (1¼ ounce per sq. ft.) galvanizing. Purlins are kiln-dried; construction grade Douglas Fir. Galvanized Cannonball Door Track and galvanized door hardware. Die formed corners, flashing and trim.

LARGE DOORS. Double Doors 16' wide by 14' high can be placed in the end walls. Single sliding doors 15' wide by 12' high can be placed in the side walls. Windows 1' 10" wide by 2' 5" high, and plastic translucent sheets to be placed in the roof or sidewalls are available.

MORTON

STEEL SPAN BUILDING NO. 51

**Post Free Interior
Large Doors In Ends Or Sides**

MAKES AN IDEAL WAREHOUSE OR MACHINE SHED

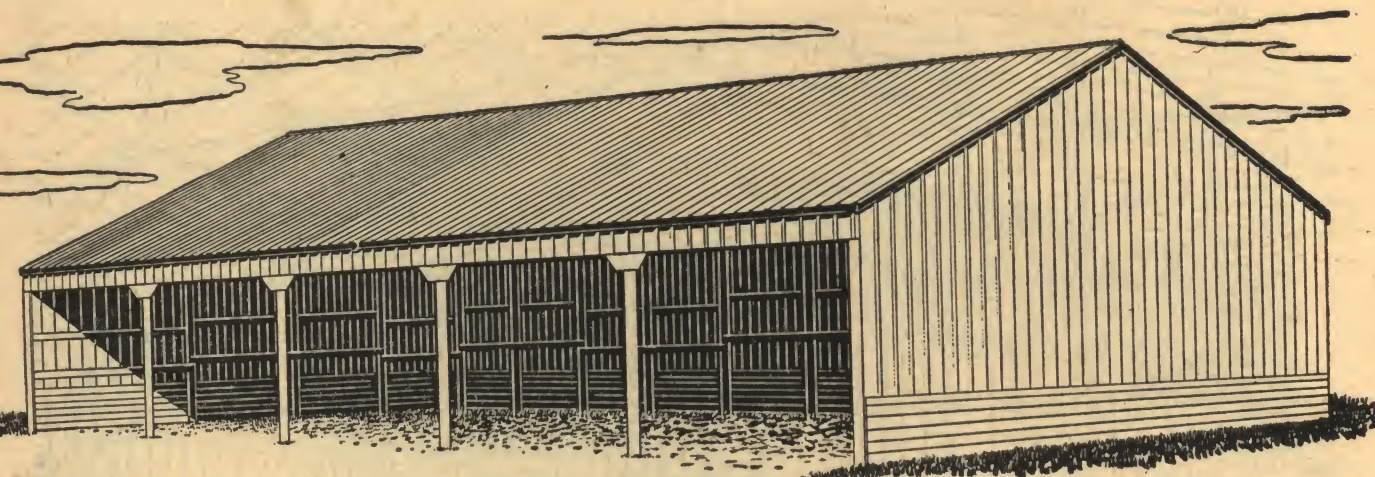

NO POSTS INSIDE THE BUILDING. The steel ridged frames form continuous units from foundation across the building. The entire floor space can be used to the best advantage. Machinery can be maneuvered with greatest ease. Vertical sidewalls permit storage to utilize the full height of the sidewall.

LARGE DOORS to accommodate all types of farm

machinery in general use can be placed in the MORTON Steel Span building. Four row equipment used on many farms requires doors 16' wide. With large doorways in the MORTON Steel Span building, you can get the biggest farm machinery into and out of the building without partial dismantling or bumping into the door jambs.

MORTON

POLE LIVESTOCK SHELTER NO. 31

CLEAR SPAN—EASILY ERECTED

The MORTON Pole Cattle Shelter is 28', 32', 36', or 40' wide and 60' long. The length may be increased or decreased in units of 15'.

NO POSTS INSIDE THE BUILDING. The framework of the building consists of trussed rafters supported by pressure treated poles. The trussed rafters are pre-cut and drilled and assembled on the job site with $\frac{1}{2}$ " bolts and ring connectors. Ring connectors give up to 4 times the strength as compared to a connection made with a bolt only. Poles are treated with No. 1 creosote oil to a minimum retention of 8 lbs. per cubic foot.

CONVENIENT. The south side of the building has an open front so that cattle can move freely back and forth to the feeding bunks. Because the open front is 8'-8" high, a tractor with manure loader can be conveniently used for mechanical cleaning of the building. The open front makes a cooler building in the summertime and provides plenty of ventilation in the winter. Bedding can be stored anywhere in the building that is desired. The formation of a manure pack provides warmer quarters for stock and requires removal only a few times a year.

EASY TO ERECT. The MORTON Pole Cattle Shelter is designed for simplicity of construction. The use of poles to support the roof and sidewalls eliminates the need for a concrete foundation.

HAY SELF-FEEDER

No. 27

The MORTON Hay Self-Feeder is 26' wide by 60' long with a 7' overhang on either side of the building to provide protection for the feed manger and the cattle. The length can be increased or decreased in units of 15' of length. A 60' long building has a capacity of 108 tons of baled hay or 84 tons of chopped hay. Each 15' section has a capacity of 27 tones of baled hay or 21 tons of chopped hay.

MORTON

CATTLE FEEDING BARN --- NO. 33

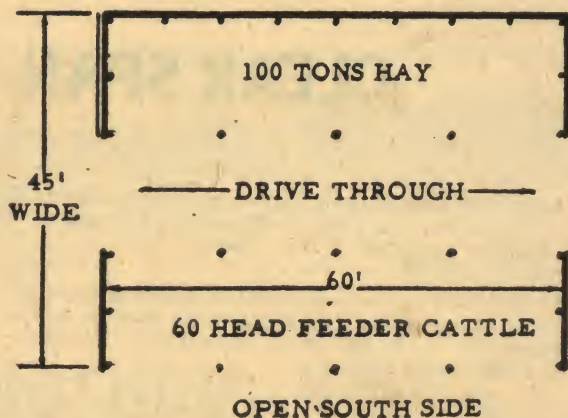

SAVES LABOR---
STORES HAY
WHERE IT IS TO
BE FED

The MORTON Cattle Feeding barn is 45' or 52' wide by 60' long. The length can be increased or decreased in units of 15' to any length that is desired. A 52' x 60' building has an approximate capacity of 100 tons of baled hay plus 60 head of feeder cattle. A fifteen foot addition will accommodate an extra 15 head of cattle. Extra hay can be stored in the loafing area. This will be fed first so that the loafing area will be available for shelter in the winter.

SAVES LABOR. Large double doors are located in both ends of the building, so that a loaded hay rack can be pulled through the building. Baled hay can be unloaded right off the rack at the place it is to be stored. Cattle feed through movable feeding fences, which are moved back as the hay is consumed. Feeding labor is held to a minimum.

EASY ERECTION. Detailed plans and step-by-step erection instructions assure quick and easy erection even with the use of unskilled labor. Since the need for a concrete foundation is eliminated, you save the cost of the concrete, plus the cost of building forms and pouring the concrete.

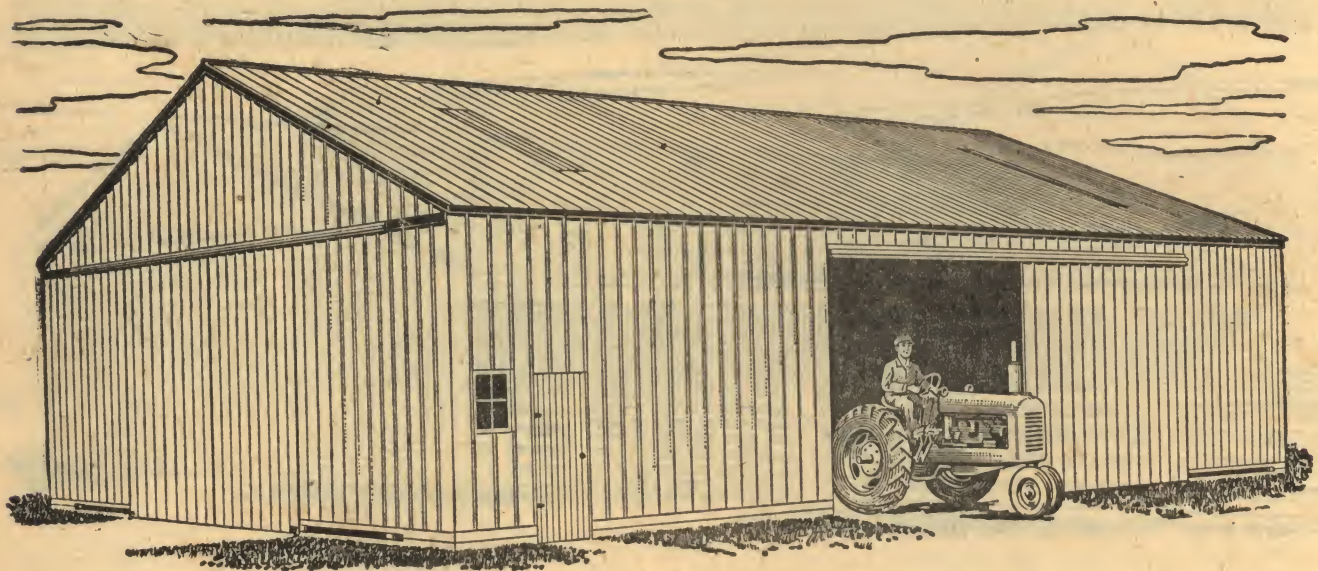

QUALITY MATERIALS. Every effort has been made to include only the finest available materials. Poles are pressure treated with No. 1 creosote oil to a minimum retention of 8 lbs. per cubic foot. Splash boards around the base of the building are pressure treated with Penta. Framing lumber is kiln-dried West Coast Douglas Fir or Hemlock. Pole type anchor nails, strong-back ties, galvanized door track and galvanized door hardware are included.

Galvanized steel, roofing and siding are available in your choice of 29 gauge, 1 1/4" corrugated, commercial grade (1 1/4 oz.) zinc coated; or the new 28 gauge, Hi-Rib sheets which are protected with a Seal of Quality (2 oz. per square foot) zinc coating. Door jambs, track board, and trim lumber which are exposed to the weather are dip painted with red enamel.

MORTON

POLE MACHINE SHED NO. 32

CLEAR SPAN---LARGE DOORS

The MORTON Pole Machine Shed is available in widths of 28', 32', 36' or 40'. The length is 60' and can be increased in units of 15' to any length that is desired.

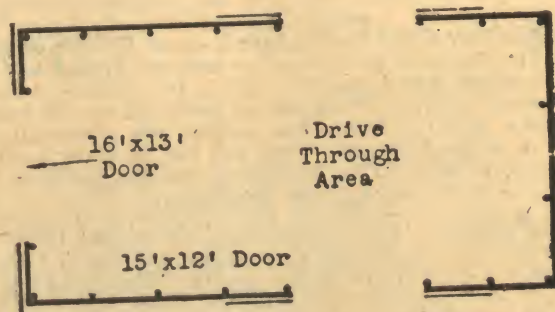

CLEAR SPAN—The roof is supported by trussed rafters which are bolted to the poles. The entire floor space is free of obstructions and can be used to the best advantage. Machinery can be maneuvered with ease.

LOW COST—Detailed plans and erection instructions permit quick erection of the pole framework. Since the need for a concrete foundation is eliminated, you save the cost of building forms and pouring concrete. Roof trusses are pre-cut and drilled and are quickly assembled on the ground with bolts and ring connectors so that an entire building may be framed in a few days time.

Galvanized steel, roofing and siding are available in your choice of 29 gauge, 1 1/4" corrugated, commercial grade (1 1/4 oz.) zinc coated; or the new 23 gauge, Hi-Rib sheets which are protected with a Seal of Quality (2 oz. per square foot) zinc coating.

QUALITY MATERIALS—Every effort has been made to include only the finest available materials. Poles are pressure

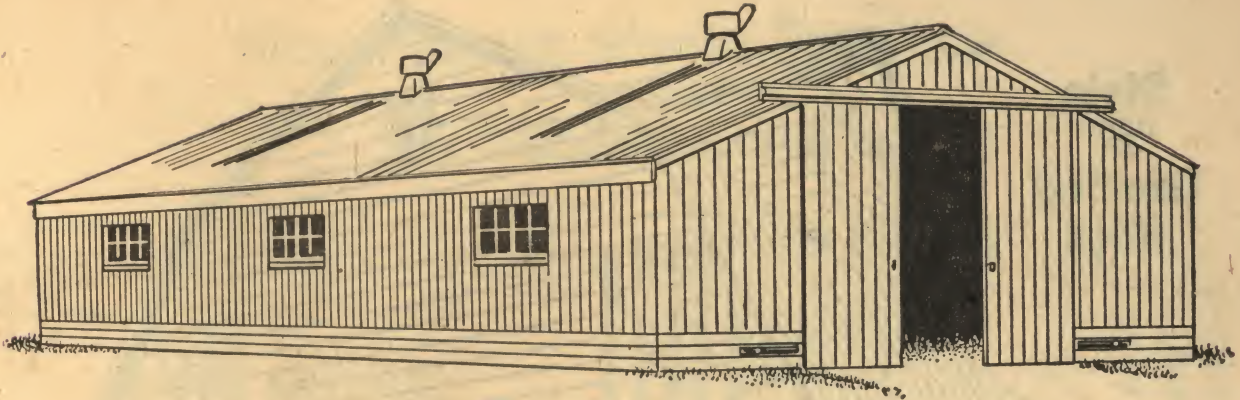

treated with No. 1 creosote oil to a minimum retention of 8 lbs. per cubic foot. Splash boards around the base of the building are pressure treated with Penta. Framing lumber is kiln-dried West Coast Douglas Fir or Hemlock. Pole type anchor nails, strong-back ties, galvanized door track and galvanized door hardware are included.

DOORS 15' wide by 12' high can be placed as desired in the sidewalls. Doors 16' wide by 13' high can be placed in the ends of the building. Windows or plastic translucent sheets can be placed in the roof or sidewalls.

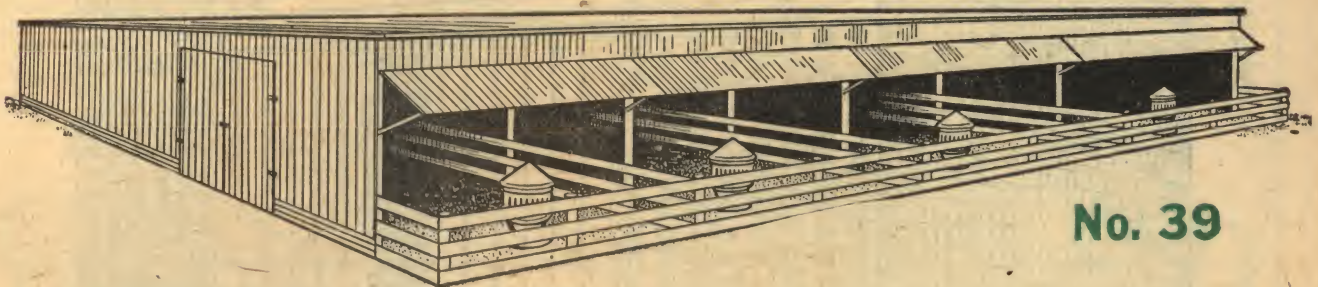

MORTON

FARROWING HOUSE NO. 38

The MORTON Farrowing House No. 38 is 24' wide by 60' long. The length can be increased or decreased in units of 15'. A 60' long building can accommodate 24 Farrowing Stalls, or 12 Stalls plus 8 7½' x 8' Pens.

A low, Insulated Ceiling, and low 6' sidewall help retain animal heat to keep the building warm. Siding on the ends and sidewalls is 1"x8" pattern No. 116 Spruce. Roofing consists of Galvanized Steel over 25/32" insulation board and 2"x4" roof nailers.

No. 39

MORTON

HOG FINISHING HOUSE

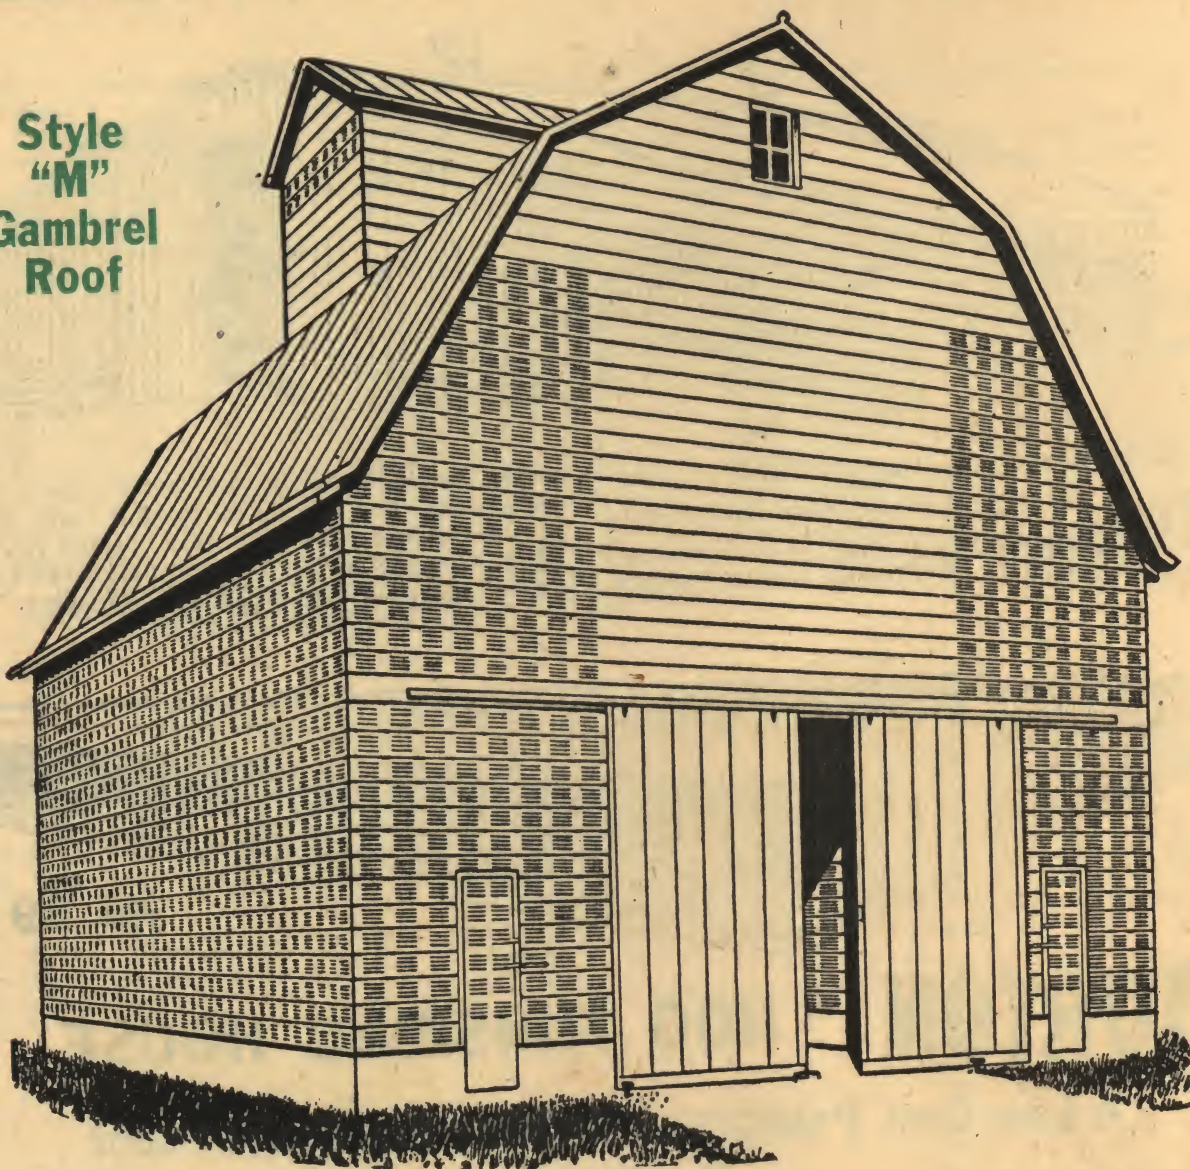

A Low Cost Permanent Building For Confinement Hog Feeding

The MORTON Hog Finishing House No. 39 is an Open-Front, Permanent Shelter for finishing hogs on a concrete floor. The shelter is 27' wide and the concrete floor is 30' wide. The length is 64' which consists of four 16' pens with a capacity of 40 head per pen. The length can be increased or decreased by adding 16' pens.

The floor area is divided into a 14' deep sleeping area, an 8' wide gutter and an 8' wide area for feeders and waterers. The Shelter features a low, shed-type roof with an insulated ceiling to retain animal heat in cold weather, 4' wide doors swing up over the open front to provide shade in the summer, and reduce drafts in the winter.

MORTON CRIB and GRANARY

Style
"M"
Gambrel
Roof

MEYER ELEVATORS

The MORTON Crib and Granary is designed to accommodate a Meyer No. 1 cross driveway elevator. A large cupola of the correct dimensions is furnished. Where the crib is to be filled with an outside portable elevator we recommend our style "A" Gable Roof crib and granary with a 4' wide by 4' long cupola.

Most Complete Line

The most complete line of combination crib and granaries. Choose from the following:
 Roof Style—"A" Gable Roof; "M" Gambrel Roof.
 Crib width—6', 7', 8' or 9'.
 Driveway width—11' or 13'.
 Length—Basic length starts at 34'. Length can be increased or decreased in units of 4'.
 Cribbing—1" x 6" beveled wood cribbing or MORTON 24 gauge, 2 ounce coated, louvered steel cribbing.

MORTON

LOUVERED STEEL CORN CRIBBING

New Pattern Stores Ear Corn or Shelled Corn

The new Style "J" MORTON Louvered Cribbing was especially designed with small louver openings to store shelled corn as well as ear corn. It is heavily constructed of 24 Gauge Steel, with 1" high ribs spaced 8" apart. It is nailed to studs with 2½" long, galvanized annular shank nails.

50% MORE VENTILATION

Viewed from the outside the louver openings appear as mere slits, and it can easily be seen why rain blowing in is held to a minimum. Viewed from the inside, however, the full louver opening, which represents more than 15% of the siding area, can be seen.

RAT PROOF

MORTON louvered steel cribbing gives protection from rats, which cannot be obtained with ordinary wood cribbing. The Pure Food and Drug Act prohibits the sale of contaminated grain for human consumption. More rigid enforcement of this law in the future will make rat-proof cribbing a necessity.

NO PAINTING

A crib protected with 2 oz. coated MORTON Louvered Steel Cribbing, 2 oz. coated steel roofing and galvanized flashings and trim lasts twice as long without requiring paint or any other upkeep. The cost of labor and materials for 3 or 4 complete paint jobs is saved. After a 20 year period, if painting is required, the paint may be sprayed on, and will hold better and last longer on metal than on wood.

Remodel Your Old Crib To Store Shelled Corn

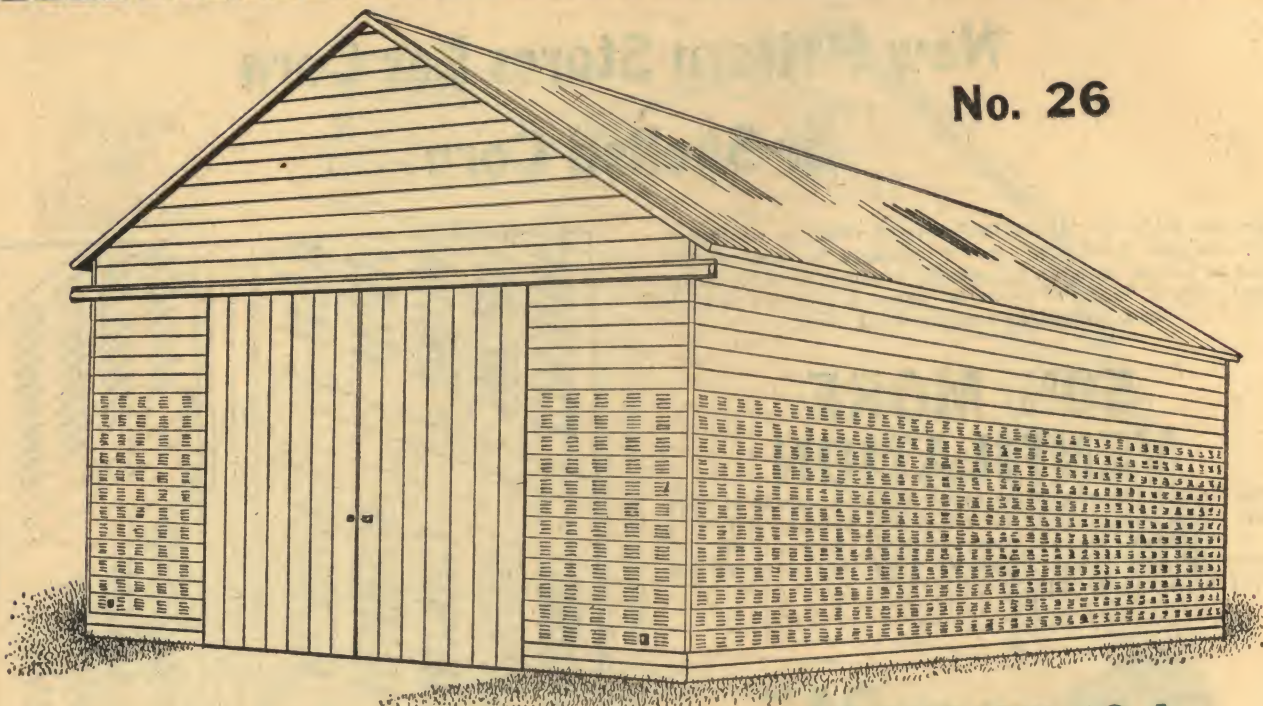

If you need storage for shelled corn, your present ear corn crib can be remodelled to provide storage at the lowest cost. Use MORTON 24 Gauge, 2 Oz. Coated, Steel Siding.

Write for free booklet "REMODELING CRIBS FOR SHELLED CORN STORAGE".

MORTON

FLAT EAR CORN STORAGE BLDG.

No. 26

A VERSATILE BUILDING WHICH DOUBLES AS A MACHINE SHED, OR CAN BE CONVERTED TO SHELLLED CORN STORAGE

The MORTON Flat Ear Corn Storage Building provides convenient ear corn storage at low cost. The size is 26 ft. wide by 40 ft. long with a capacity of 5000 bu. The length can be increased or decreased in units of 4' which would increase or decrease the capacity by 500 bu.

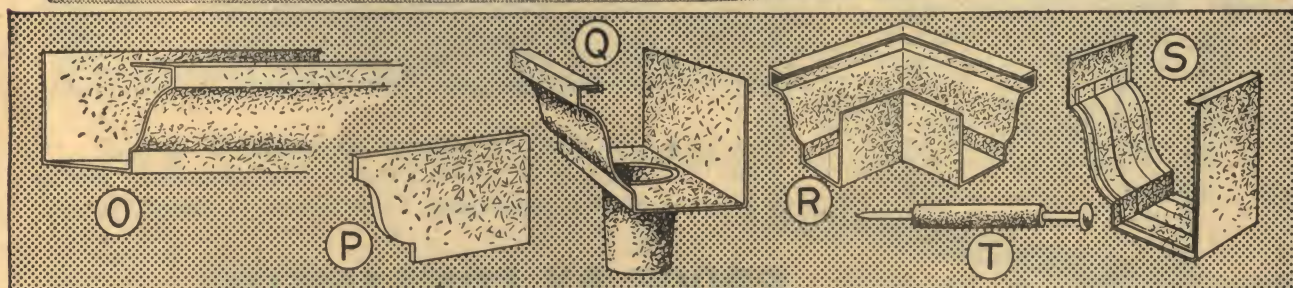

This building is erected on a concrete slab floor. Precut studs are set in heavy MORTON Stud Sockets. Roof trusses are precut and assembled on the job with ring connectors.

MORTON 24 Gauge Louvered Cribbing makes a rodent free covering for the side walls. The entire roof and sidewall area is protected with a 2 oz. per sq. ft. zinc coating; so that painting will not be required for up to 20 years. Corn dries faster because MORTON

Louvered Cribbing provides 50% more open flue area than conventional beveled wood cribbing.

A drying tunnel runs the length of the building. The tunnel is built in sections which are removable as the building is being emptied. Corn is taken out of the building by a tractor with a front end loader or scoop. Corn is put into the building with a portable elevator through openings in the roof.

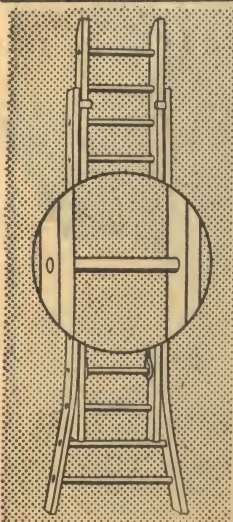

The building can be easily converted to a bin for storing shelled corn. MORTON Louvered Cribbing used on the walls has small louver openings, and is of sufficient strength to hold the pressures of shelled corn. The sidewalls would have to be reinforced by adding 2"x8" studs 2' o.c.

Interlocking Galvanized Gutters

Interlocking Gutters are constructed of heavy 26 gauge steel, heavily galvanized to resist rust. Eaves trough and downspout furnished in 10 ft. lengths only. Eaves trough may be joined by means of slip joints without the use of solder.

Now, the Minimum Number of Years of Roof Service Providing Maximum Protection, is spelled out in an Iron-Clad Guarantee Under Bond backed by one of the World's Largest Bonding Companies, The Fidelity and Casualty Company of New York, with Assets in Excess of Two Hundred Eight Million (\$208,000,000) Dollars. All "Guess or Gamble" is Eliminated.

Mica Surfaced Smooth Roll Roofing

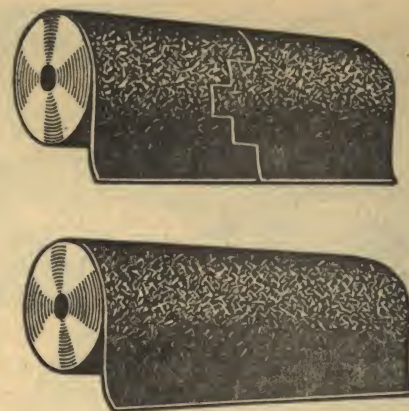

Interlocking Smooth Roll Roofing is extra thick, extra strong and long lasting, made to give years of service. Constructed on heavy felt base and thoroughly saturated with Pure Asphalt. INTERLOCKING Roll Roofing contains a higher percentage of pure asphalt than most other brands. The roofing is covered with a surface of mica granules to give it extra protection from the sun and weather. It is recommended and approved by the Fire Underwriters as being fire resistant. Because of this, it carries a lower insurance rate.

No. 302—45 lb. Standard Wt., per roll. . . . \$2.50

No. 303—55 lb. Heavy Wt., per roll. 3.45

No. 304—65 lb. Extra Heavy Wt., per roll. . 3.95

Asbestos Fibre Roof Coating

A—Staggered Edge Roofing

Economy Roll Roofing that gives the effect of individual Shingles. Felt base treated and coated with a special long-life asphalt. Ceramic granules have their own colors—will not fade or wash off. Rolls 32 in. wide and die cut down center forming two staggered edge strips. One roll covers 100 sq. ft. with 2 in. headlap. Use 2 lbs. galvanized roofing nails per square. Three colors: GREEN BLEND, BLUE BLEND, and RED BLEND.

Price Per Roll (100 sq. ft.) \$5.75

B—Slate Surfaced Roofing

Here is one of the best Slate Surfaced Roll Roofings obtainable. Excellent for new work, or for covering old roofs. The extra weight gives greater durability and greater wearing qualities. So tough, you can hardly tear it. Weighs approximately 90 lbs. per square. One roll covers 100 sq. ft. Available in GREEN, RED, BLACK or GREEN BLEND colors.

**No. 501—90 Lb. Slate Surfaced
Roofing, per roll \$4.50**

Ready To Apply

**Adds Years To Life
Of Old Metal or
Asphalt Roofs.**

Interlocking SUPERIOR Long Fibre Liquid Asbestos Roof Coating is made of waterproof materials and is especially adapted for felt, composition paper metal roofing. It can be applied over a roof that already leaks and additional years of roof service will be obtained.

SUPERIOR Roof Coating is to be applied just as it comes without mixing or thinning—using an ordinary paint brush or roof brush as shown. Covers approximately 125 sq. ft. of roofing to the gallon, or if the roofing is old and dried out, it will cover approximately 100 sq. ft. per gallon.

A Complete Roofing Service

For years INTERLOCKING has been recognized as the leader in roofing and siding in this area. There are reasons why more people than ever before are buying their roofing and siding from us. We offer the most complete selection of styles and colors. Whether your choice is Asphalt, Asbestos, Aluminum or Galvanized Steel, INTERLOCKING has a style and color to suit your particular needs.

As leaders in the field, INTERLOCKING products are known for their quality.

A fleet of new semi-trailers enables us to give delivery service direct to your farm on most orders over \$50.00. Since INTERLOCKING quotes delivered prices, you know to the penny what your merchandise will cost.

Because of our volume operation, we are able to offer you roofing and siding at attractive prices, often resulting in a considerable saving. An INTERLOCKING representative travels regularly in your territory. Just mail the coupon below to us and a free quotation on the cost of covering your buildings will be yours for the asking.

3-in-1's with COPPER CLIPS

3-in-1 Thick Tabs are offered in a variety of colors which will harmonize with any house. Constructed with a heavy felt base, thoroughly saturated with asphalt. Cannot blow up, when applied with INTERLOCKING'S Copper Clips.

DOUBLE COVERAGE SEAL LOCK

Seal Lock Shingles are extra heavy weight. The tab of each shingle locks into the shingles beneath, making an attractive design and a covering which cannot blow up. Goes on fast, since fewer nails are required.

TRI-TAB HEXAGON

Tri-Tab Hexagon Shingles are recommended where a good roof is needed and primary consideration must be given to price. Will last 17 years under ordinary weather conditions.

Lifetime Asbestos Shingles never wear out. Never need paint. Phone or Write your nearest INTERLOCKING Store for an estimate on Lifetime Asbestos Roofing or Siding—No obligation on your part. You will find the cost much less than what you thought

KOLD — ROLD GALVANIZED STEEL

50% STRONGER---1 $\frac{1}{4}$ OZ. ZINC COATED

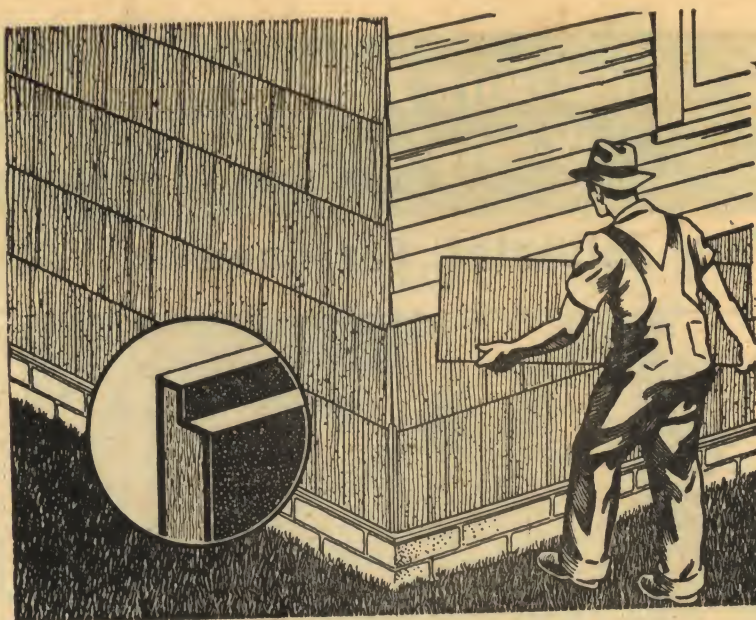

KOLD-ROLD Sheets are more than 50% stronger than ordinary Galvanized Roofing Sheets. This extra strength is obtained by using the best grade of Open Mearth Steel, which are manufactured by an exclusive, patented cold rolling process.

KOLD-ROLD Sheets are protected against rust by a zinc coating of 1 $\frac{1}{4}$ ounces per square foot. This extra heavy coating of zinc galvanizing means that KOLD-ROLD Sheets last up to twice as long without showing signs of rust. Sheets are 26" wide—1 $\frac{1}{4}$ in. corrugated.

INSULATED SIDING PANELS

Makes Your Old House Look Like New
Extra Heavy Insulation Saves Fuel
A Lifetime Covering—No More Painting Costs

The new lap siding and shingle design patterns, available in white blend, green and gray colors, are most attractive. Thousands of customers have selected the Brick-V-Neer patterns in Red or Buff Brick colors. For a large house the gray stone pattern is well suited. Whatever your choice of colors your home will become a source of pride to you and a source of envy to your neighbors.

An exceptionally beautiful covering, one that stays good looking through the years. Your first cost is the only cost since your home has a lifetime covering. Eliminates all future painting cost. You make additional savings since these panels are one of the finest fuel savers known. Panels are constructed of $\frac{1}{2}$ " thick insulating board, thoroughly saturated on front and back with weatherproof asphalt. Ceramic granule covering will not fade. Can be applied over any type of weatherboards or sheathing. The cost is surprisingly low and when you consider the fuel saving and that painting is actually eliminated, it pays you dividends year in and year out. Phone or call at your nearest INTERLOCKING Store for a free estimate on Material and Labor for siding your home.

ROLL BRICK SIDING

You'll be justly proud of your home after you apply attractive, practical, low cost Interlocking Protection Brick or Stone Design Asphalt Siding. It is a permanent improvement and one of the best investments you could put into your house, it pays for itself on money saved in fuel and painting. Each roll contains sufficient material to cover 100 sq. ft. Starting Strip contains 133 lineal feet per roll. FOUNDATION BOARD is recommended when applied over weather boards. Foundation Board is $\frac{1}{8}$ " thick, 30" x 48" (10 sheets per sq.). When applied beneath the roll siding it makes a smooth, good looking job and adds insulation value.

Special Corner Strips are $2\frac{1}{4}$ x $2\frac{1}{4}$ x $3\frac{3}{4}$ in. long and are made to match the color brick you select.

Red Blend Brick, per roll	\$5.50
Buff Blend Brick, per roll	5.50
Stone Design, per roll	5.50
Corner Strips, per ft.	.35
Black Rust-Proof Nails (2lbs. per sq.), per lb.	.30
Black Caulking Compound, 10-lb. can	1.35
Wood Moulding Window Trim, per ft..	.07
